OUR MISSION

Founded in 1997, we are a student organization that helps students gain practical multidisciplinary robotics experience in the lab, and we demonstrate our abilities at various robotics competitions while promoting robotics via community outreach.

STUDENT BODY

By sponsoring us, you will gain access to a bright student body through tech talks, socials, and our exclusive student information database.

TECH TALKS

Support our organization by sharing your company's vision and culture through tech talks. With over **240 active members**, RAS offers a valuable platform to engage with passionate, bright students eager to learn from industry professionals and explore career opportunities.

NETWORK

Gain access to our student information database and receive an exclusive invitation to our annual Networking Night. While our members come from diverse backgrounds, the majority pursue degrees in Computer Engineering, Electrical Engineering, Mechanical Engineering, and Computer Science.

SOCIALS

If your company is interested in supporting our club by hosting a social event, we'd be thrilled to collaborate. In appreciation, we'll proudly feature your company across all our social media channels. Our social events provide a great way to connect with our vibrant community in a casual and engaging setting!

OUR COMMITTEES

Additionally, by sponsoring RAS, you will also sponsor the **four individual robotics committees** that RAS is comprised of.

2025 VEXU World
Championship Innovate
Award

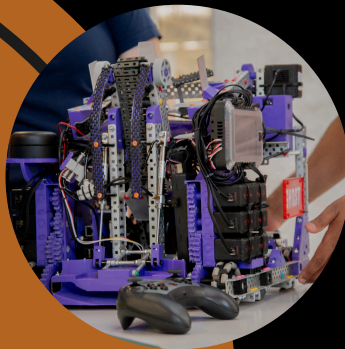

2024 VEX AI World
Championship Excellence
Award

2023 VEXU World
Championship Build
Award

2022 RoboMaster North
America University
League Competition 4th
Place

STAMPEDE

A competitive robotics team featuring three automated shooter turrets to compete in Advanced Robotics Competition (ARC). Specializes in advanced computer vision and localization algorithms for auto-targeting and self-navigation.

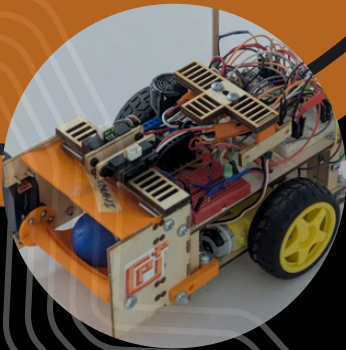

VEXU

A competitive robotics team featuring a fun, open environment for members to learn and compete in VEXU and VEX AI. Pushes the boundaries of robotics with its developments in swerving mechanisms and advanced lidar stacks.

DEMOBOTS

Our non-competitive robot teams that demo their creations and passion projects at university events and our robotics showcase—featuring crowd favorites like Couchbot, Dancebot, Polargraph, Chessbot, and FishGPT.

ROBOTATHON

An annual introductory robotics competition hosted by RAS, designed for students of all experience levels to design, build, and compete in a supportive, inclusive environment. Emphasis on the fundamental basics of electronics and mechanical design.

HOW TO SUPPORT

We aim to build a welcoming robotics community, increase accessibility for newcomers, and spark lifelong friendships rooted in innovation and creativity.
Your support brings that vision to life!

Benefits	Gold \$1,500 *\$500	Platinum \$2,500 *\$750	**ECE Connect Advantage
Host one technical or social event per academic year	X		X
Host two technical or social events per academic year		X	
Invitation to Networking Night	X	X	X
Access to student information	X	X	X
Recognition as sponsor at events, in communications, on website, and additional materials	X	X	X
Sponsorship of the four robotics committees	X	X	X

*Indicates startups with <50 employees

**As part of the ECE Connect Advantage program, 20% of each corporate contribution is allocated directly to selected ECE student organizations.
